Press Release

port and Heyfra join forces serving Industrial communication customers even better

Sales Directors Heike Neumann (HEYFRA) and Christian Bornschein (port) announce the collaboration of the companies.

Both companies extend their scope of service.

Heike Neumann of Heyfra: By collaborating with port in Halle / Saale Heyfra extends its services, providing now engineering services in the field of Industrial Communication. Our customers demand specific Hardware und Software solutions to enable their products for industrial networking. Their focus is on PROFINET, EtherNet/IP, EtherCAT, POWERLINK and CANopen.

Until now we lacked competence in the field of software, we are happy now to provide this as well.

Christian Bornschein of port: Aligning with HEYFRA we chose a partner who has almost 20 years of experience as a qualified E²MS provider. HEYFRA has a long experience supporting the development of a products from concept until its series production. We can offer now to our customers a reliable Life Time Management of their products, including the supply chain. We will now set up the corresponding structures in the companies.

Port has focused on Communication Technologies like Protocol Stacks, Drivers for Fieldbuses and reliable Tools as standard products. Based on this valuable Know-How we offer services like consulting, training, specific hardware adaptations and customer specific hardware and software development. Our certified in-house project management enables us to handle big projects as well.

Geschäftsleitung

25. Januar 2012

Port is one of the leading providers for Communication Technologies. Starting with CANopen in 1990 port supports now the Industrial Ethernet technologies PROFINET, EtherNet/IP, EtherCAT and POWERLINK as well. Besides the standard activities like licensing protocol stacks, training and implementation port also offers customer specific engineering services and manufacturing services for electronic devices and systems.

about HEYFRA

Heyfra was established 1994 in Eisleben and is an recognised E²MS / OEM provider. As an added value to the Manufacturing Services Heyfra offers customer specific engineering services and OEM developments. Heyfra is focussed on "Hig-Mix – Low Volume".
