PRESS RELEASE

New distribution agreement between port GmbH (Germany) and Sightsys Ltd. (Israel)

"...Utilization of Real-time communication protocols in various market segments such as Industrial control, Automation, Robotics, Engine control and others, has driven throughout the years the necessity to set some industry standards in order to achieve compatibility, high reliability and maximum performances, such as CANopen, EtherCAT, Ethernet-Powerlink, Profinet and others.

Sightsys Ltd (Israel) develop recently a specific knowledge-center and products portfolio in order to offer its customers a complete solution of various stacks, libraries, tools and services. We are proud to add **Port GmbH (Germany)** as our leading company for the various real-time protocols, libraries and tools. **Port GmbH**, is a leading company from Germany in the area of real-time industrial fieldbus protocols and industrial ethernet solutions.

Port GmbH is a perfect fit to our plans as it will be a part of our complete services and solutions to those new markets we are looking to expand. The Israeli market is expanding even beyond the traditional market segments..."

Said Zvika Almog, **Sightsys Ltd.** general manager.

"...We see many people who are not coming from the typical traditional CANopen, EtherCAT-like oriented industry segments, so we believe that demand for PORT's products will grow..."

Dietmar R. Franke CEO at **port GmbH**

" Sightsys is the right partner for us. Now we have a partner with experience in the area of field bus systems and industrial ethernet technology in Israel. We can clearly improve the local support and our customers in Israel have a local contact."
