PRESS RELEASE

port GmbH strengthens its sales and support in Asia – Cooperation with Accelerated Technology Korea started"

Due to the cooperation with "Accelerated Technology Korea", the port GmbH expands its presence in Korea (Asia). "Due to the rising demand from Asia, we were forced to search for a strong partner for the sales support /advice and after sales service," said Dietmar R. Franke, CEO of the port GmbH

"With [Accelerated Technology Korea](#), we have found the right partner. Already started last year, the cooperation is very successful, so we can now expand. For our stacks, tools and drivers of the industrial communication technology (CANopen, PROFINET, POWERLINK, EtherCAT, Ethernet I / P and IP cores), there is now a first-level service, which is especially important for our technology partners such as Texas Instruments, Renesas, STM, ALTERA or XILINX. With this cooperation, we have taken the first important step towards "One Face to Customer" in Asia "- says Dietmar R. Franke (CEO of the port GmbH)

About port

port is known as one of the leading providers for communication technologies. Starting with CANopen in 1990 port the portfolio now contains all major protocol of the Industrial Ethernet world such as PROFINET, EtherNet/IP, EtherCAT and POWERLINK. Besides the standard activities like licensing protocol stacks, training and implementation port also offers customer specific engineering services and manufacturing services for electronic devices and systems.
